

***Product description***

Yukon Seirra ATF DX III is a premium automatic transmission fluid designed for use in vehicles. Yukon Seirra ATF DX III is recommended as a make-up and/or refill automatic transmission fluid for all passenger cars, vans, it can also be used in power steering system and other hydraulic systems when recommended or specified by the equipment manufacturer.

Features and Benefits

- Oxidation stability – Resists chemical degradation over long service periods to minimize the formation of lacquer and other harmful deposits under high-temperature operating conditions
- Superior wear protection – Minimizes wear of critical components in transmissions and hydraulic system.
- Corrosion prevention – Protects against rust and corrosion of all transmission and hydraulic system components.
- Controlled friction properties – Provides efficient and smooth shifting action of clutch plates over a wide range of operating temperature.
- Foam resistance - Prevents excessive foaming, especially during high-speed operation.

Performance

- Allison C-4
- GM
- Ford DIIIH/M

Typical Properties

<i>Properties</i>	<i>UNIT</i>	<i>METHOD</i>	<i>Specification</i>	<i>Typical</i>
AAPEARANCE	-	-	Bright & Clear	Bright & Clear
VISCOSITY 40 °C	cSt	ASTM D445	Report	36.28
VISCOSITY 100 °C	cSt	ASTM D445	7.0-8.0	7.622
VISCOSITY INDEX	-	ASTM D2270	Min 160	186
COLOR	-	VISUAL	Red	Red
