

Product Description

Yukon Slide way lubricants have been developed for the lubrication of machine tool ways, slides and guides. Available in four viscosity grades, they are made by blending high quality base oils with friction-modifying additives and other chemical agents to give them greater load carrying qualities, better anti-wear characteristics and increased adhesiveness.

Feather & Benefits

- Excellent frictional characteristics for smooth way operation and accurate work
- Good anti-wear properties for greatest protection of the ways and guides
- Good non-drip characteristics – reduced run-off, dripping and leakage helps to cut down oil loss and lessens the frequency of application.

Typical Properties

<i>Specification</i>	<i>ASTM</i>	<i>ISO 68</i>	<i>ISO 220</i>
Appearance	-	Tacky	Tacky
Colour	D 1500	L1.5	L2.0
Viscosity @ 40 °C (cSt)	D 445	68.44	221.6
Viscosity @ 100 °C (cSt)	D 445	8.994	19.50
Viscosity Index	D 2270	106	100
